

Score (0 – 50)	Criteria
40 – 50 (Excellent / Outstanding)	Project has far exceeded the stipulated learning outcomes in terms of complexity, innovation and quality. • Supervisor provides high commendation on the deliverable. • Applies curriculum concepts with added depth through independently acquired knowledge and skills. • All components of the proposed solution(s) are fully implemented, integrated, and robust. Project has many highly complex functions and features. Demonstrates strong attention to end-user experience through clear structure, intuitive interactions, and thoughtful design decisions appropriate to the nature of the solution.
35 – <40 (Good)	Supervisor provides good feedback on the deliverable. • Most components of the proposed solution(s) are fully implemented, integrated, and robust. Project has

	many advanced functions and features. Demonstrates good attention to end-user experience through clear structure, intuitive interactions, and thoughtful design decisions appropriate to the nature of the solution.
30 – <35 (Average)	Supervisor provides satisfactory feedback on the deliverable. Important features have been completed with minor bugs. Project has some advanced functions and features. Demonstrates some attention to end-user experience through clear structure, intuitive interactions, and thoughtful design decisions appropriate to the nature of the solution.
20 – <30 (Below Average)	Supervisor provides somewhat satisfactory feedback on the deliverable. Core features are working but with some bugs. Project has few advanced functions and features. Demonstrates poor attention to end-user experience through unclear structure, unintuitive interactions, and

	poor design decisions
0 – <20 (Poor)	Supervisor provides poor feedback on the deliverable. • Features are not working. Project lacks technical depth.
